

YOUR NEW ZEALAND MANUFACTURED ORGANIC SOLUTION
TO A CLEAN GREEN ENVIRONMENT

Grease Converter & Trap | Information & Set-up

START UP ON INSTALLATION

INDUSTRIAL - C32

On Installation:

1. Turn tap on in sink and let cold water run for 10 minutes to fill grease converter.
2. Turn tap off and add 1 litre of Bio-Zyme Industrial down sink drain into grease converter.
3. Dose It Pump will dose 100ml at 11pm each day through pump automatically.

NOTE 1: Do not throw Bio-Zyme Industrial lid away. Remove lid and drill hole in lid for tube coming from pump. Use same lid on each replacement of 5L bottles.

Important

Under Manufacturer Instructions

If using Bio-Zyme Industrial for the reduction of FOGs the Bio-Zyme Pre-Treatment Compliance Record must be completed online and submitted. (refer to Note 2 above).

Features & Benefits:

- Readily biodegradable cleaner that neutralises contaminants.
- Environmentally-preferable.
- NZ Council Approved for use in Grease Converter/traps.
- Approved/endorsed by grease converters' manufacturers: Kings Custom Ltd, Clenz / Mactrap, Hugo Plastics

MAINTENANCE

INDUSTRIAL - C32

After converter has been cleaned out by liquid waste contractor:

4. Turn tap on in sink and let cold water run for 10 minutes to fill grease converter.
5. Turn tap off and add 1 litre of Bio-Zyme Industrial down sink drain to kick start process.
6. Dose It Pump will dose 100ml at 11pm each day through pump automatically.

NOTE 2: Pre-treatment Compliance Record to be set up. Complete the Pre-Treatment Compliance Setup Record: www.bio-zyme.co.nz/ compliance and submit it. This will give you a reminder for Replacement Dates.

Tip:

If you think the pump is **not working properly**:

- Unscrew screws to open the front cover of the pump.
- Check date & time - if not correct for today's date & time, reprogramme date & time using arrow buttons.
- Use Prime button to start liquid flowing.
