

FLAX

WATERFREE URINAL
VITREOUS CHINA

Patented, sealed cartridge uses a biodegradable sealant liquid to control odors.

100% compatible with all Falcon Waterfree urinals, worldwide.

Replacement Cartridge: HPKV-R

Waterless urinals reduce water and sewer costs, maintenance and repair bills, and create more hygienic, odour-free restrooms. A patented, sealed cartridge eliminates the need for water, conserving an average of 150,000 litres per urinal each year.

With **Waterless** urinals, water does not have to be pumped to or from the urinal. This saves energy, which in turn reduces carbon dioxide emissions associated with energy production - emissions that would otherwise contribute to global warming

Purchasing and installing **Waterless** urinals is less expensive than manual and automatic flush units because flush valves and associated piping are not required. Maintenance costs with flush valves are also eliminated.

FEATURES

- Touch-free operation
- Uses no water
- Mechanical-free design
- Patented, sealed locking cartridge
- Maintenance-free cartridge
- Smooth, non-porous surfaces
- Vitreous china bowl

BENEFITS

- Improved hygiene and safety
- Reduced water and sewer costs
- No costly flush valve or sensor repairs
- Odour-free and vandal proof
- No need to replenish sealant between changes
- Minimal care and easy cleaning
- Unsurpassed durability

Manufacturer's Instructions

HOW TO CLEAN THE WATERLESS URINAL

Recommended Product: **Bio-Zyme Cleaner**

On installation and when replacing cartridge **every 3 months**:

1. Pour one bucket of boiling water down drain
2. Clean urinal & drains with **Cleaner** (60ml/1L of water)
3. Shock Dose 100ml of **Cleaner** directly into drain

Daily Cleaning: 60ml of **Cleaner** per 1L water.
Foam onto Urinal. Clean and wipe off.

Bio-Zyme
Cleaner
available in:
1L, 5L, 20L

REDUCE COST - SAVE WATER

EASY RETROFIT FOR YOUR EXISTING URINAL

How to install new HPKV-C?

1. Turn water off.
2. Remove existing waste.
3. Shock dose drain with 100ml Bio-Zyme Cleaner.
4. Install Retrofit kit.
5. Clean daily with Bio-Zyme Cleaner at 60ml per 1L of water - refer to 'How to Clean Waterless Urinal' section on previous page.

Key-Valve® E

The Key-Valve® E, consisting of the Key-Valve and the Key-Ring, seals the drain opening to prevent the emission of odours from the drain without using water or other sealing liquids. This component has a life span of minimum 7,500 usages.

Features

- No water flush required.
- Allows liquid to flow into the drain, but prevents back flow of drain gases.
- Vertical mechanism.
- Compact unit.
- Easy to handle.
- Total life span depends on rate of usage.
- The green Key-Ring is the optical life cycle indicator, it keeps the Key-Membrane® flexible and clean and, in addition, creates a pleasant scent.
- The green Key-Ring mass is fully biodegradable.
- Suitable for most available types of urinals with **50ml waste**.
- Allows to compensate negative drain pressures.

Codes for ordering:

- Retrofit Cartridge Kit: HPKV-C
- Replacement Cartridge Only: HPKV-R

Small and easy to install | Long life span
Proven for use in most urinals

The patented Key-System from Enswico is a unique siphon technology to operate urinals without water.

Replacing water with technology translates into an enormous NZ/Australasia water saving potential.

Bio-Zyme Cleaner
available in:
1L, 5L, 20L
