

YOUR NEW ZEALAND MANUFACTURED ORGANIC SOLUTION
TO A CLEAN GREEN ENVIRONMENT

Marine | Boat Wash

Where & How to use our Products

CLEANING BOATS

Reason for using Environmentally-Preferable products

- Regional Councils are actively testing water qualities in the Marina and Harbour and will be drafting new water quality guidelines for those areas in the near future.
- The Marinas are committed to protecting our water ways and have invested a lot of time sourcing a product that is environmentally preferable with a low impact on the environment. Bio-Zyme is considered **best practise for Marinas and water ways.**

Solutions

Bio-Zyme Cleaner

Cleaner - C32

Using approved Bio-Zyme Cleaner at dilution rate 60mL/1L of water for the following:

- Wash down exterior of boats
- Wash down canvas & clears
- Wash out fish bins
- Inside general cleaning all areas
- Upholstery / Carpets

Bio-Zyme is a **high performance**, non-toxic, non-allergenic and **readily biodegradable** multiple enzyme degreaser, odour controller, **cleaner/sanitiser*** (*only under MPI Approvals). **Environmentally & wastewater treatment systems preferable.** Laboratory tested - ask us about our test results, available on request.

CLEANING TOILETS ON BOATS

Problems

One of the biggest problems facing this industry is the use of strong chemicals that are toxic to disinfect and mask the waste water effluent odours, rather than help to decompose naturally.

Solutions

Bio-Zyme Industrial

Industrial - C32

- Small additions of Bio-Zyme into the grey water will help degrade and deodorise the waste for acceptable disposal to sewer.
- For marine toilets** add 100 mL of Bio-Zyme Industrial per 100L capacity to initial water charge. This will last 2 weeks. Do not use any other chemicals.
- Bio-Zyme enhances & conditions contents of waste water tank.
